

KASHISH BISHT

Full-Stack Developer | Project Management | AI/ML

Haldwani, Uttarakhand | +91 8273934608 | bishtkashish2507@gmail.com

LinkedIn: [linkedin.com/in/kashish-bisht-3970732a5](https://www.linkedin.com/in/kashish-bisht-3970732a5)

PROFESSIONAL SUMMARY

Full-stack developer and emerging PM building production systems at scale. Shipped **4+ projects** with **100% ML accuracy**, **99.8% uptime**, and **sub-2s response times**. Experienced in event coordination and enterprise project execution. Proven ability to architect scalable solutions, manage complex stakeholder ecosystems, and execute under pressure. 8 industry certifications in AI, Python, and Project Management.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C, SQL, HTML, CSS

Backend & Web: Django, Node.js/Express, REST APIs, Database Design, MySQL, Bootstrap

AI & Data Science: NLP, Sentiment Analysis, Generative AI, Prompt Engineering, scikit-learn, Pandas, Numpy, Machine Learning Pipelines

Tools & Frameworks: Git/GitHub, Docker, Render, Jira, Asana, Trello, Google Gemini API, Groq/Cohere/Cerebras/Mistral APIs

Core Concepts: OOP, Data Structures & Algorithms, SDLC, System Design, API Architecture, Load Balancing, Failover Systems

Leadership & PM: Agile/Scrum, Stakeholder Management, Team Coordination, Event Planning, Budget Management, Risk Mitigation

PROFESSIONAL EXPERIENCE

Project Management Associate Intern

Excelerate (Global, Virtual) | June 2026 – Present

- Managing experiential internship program design and delivery across **global teams**, collaborating on project planning, curriculum design, and structured briefs with weekly deliverables
- Driving **enterprise-scale operations** and stakeholder alignment, utilizing project management tools for timeline visualization and team collaboration
- Completed **structured deliverables** focusing on real-world problem-solving and team coordination

Event Coordinator Intern

Incredible MICE, New Delhi | March 2026 – May 2026

- Orchestrated corporate events including Niva Bhupa conference, managing end-to-end logistics from planning to seamless execution
- Spearheaded **cross-functional stakeholder alignment** across multiple departments, ensuring clear communication of event objectives and deliverables
- Managed vendor coordination, budget optimization, and risk mitigation to ensure seamless event execution

- Developed analytical contingency plans, identified potential risks, and maintained detailed tracking systems for timelines, vendors, and budget allocation

PROJECTS

AI Active Routes (Production Platform)

Node.js, Express, Load Balancing, 4 AI APIs, Failover Architecture

- Engineered **production-ready content generation platform** achieving **99.8% uptime** with intelligent failover across 4 AI providers (Groq, Cohere, Cerebras, Mistral)
- Implemented advanced load balancing to deliver **sub-2s response times** under varying workloads, ensuring reliable service delivery
- Deployed on Render with continuous monitoring and automatic request failover—production system handling real traffic

Django Tweet Application

Django, Python, SQLite, User Authentication, CRUD Operations, Bootstrap

- Architected **full-stack social platform** with complete user authentication lifecycle, tweet creation, following, and like functionality
- Implemented granular permission controls—users can only edit/delete their own posts, ensuring data integrity and security
- Built responsive UI with Bootstrap and Django templates, optimizing for user experience across all devices

Twitter Sentiment Analysis (ML Pipeline)

Python, NLP, scikit-learn, NLTK, Machine Learning, Data Visualization

- Built end-to-end ML pipeline achieving **100% accuracy with F1 score of 1.0** for sentiment classification on 300+ tweets
- Engineered complete feature pipeline: data collection, preprocessing, feature engineering, model training (Logistic Regression), and visualization
- Generated sentiment distribution analysis and trend visualizations—actionable insights from complex NLP data

DSA Instructor Chatbot

JavaScript, Google Gemini API, Prompt Engineering, EdTech, Input Validation

- Developed **interactive educational AI tool** enabling students to learn Data Structures & Algorithms through natural conversational interface
- Integrated Google Gemini API with advanced prompt engineering for adaptive explanations, code examples, and contextual learning
- Implemented robust error handling and input validation—transforms traditional textbook learning into mentor-like conversation experience

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science & Engineering

Uttarakhand Technical University (UTU), Haldwani | Expected Graduation: 2026

CERTIFICATIONS & CONTINUOUS LEARNING

- Project Management Certification – LearnTube.ai (May 2026)
- Python Interview Ready – SimpliLearn
- AI Foundations Associate – Oracle University OCI
- Artificial Intelligence Micro-Certification (AIC) – Product School (Apr 2026)
- Google AI Learning Path (May 2026) – Use AI Responsibly, Discover the Art of Prompting, AI Essentials
- GenAI Mastermind – Codekaro (Dec 2025)
- Decision Making – LinkedIn Learning
- AI Foundations – Google Coursera
